

MSc Business Economics: Neuroeconomics

In this one-year Master track, you will receive interdisciplinary training in Brain and Cognitive Sciences and Economics with a strong focus on Behavioral Economics and Neuroeconomics. Another important focus is the fostering of quantitative skills that allows you to employ advanced experimental methods used to understand social and economic decision-making at different levels of analysis: at the neurobiological, psychological and economic level.

Francisca Wals
Alumna recommendation

“Studying at the Amsterdam School of Economics is quite intensive. But I’ve gained so much knowledge, technical and teamwork skills: it was worth the hard work.”

Prof. Jan Engelmann
Lecturer’s vision

“You will learn the skills required for a comprehensive understanding of the brain’s role in controlling human behavior. It’s a fascinating and highly interdisciplinary field.”
